## Mangostan-Gold with the strongest, traditional natural powers of this world!

### Why exactly Mangosteen?

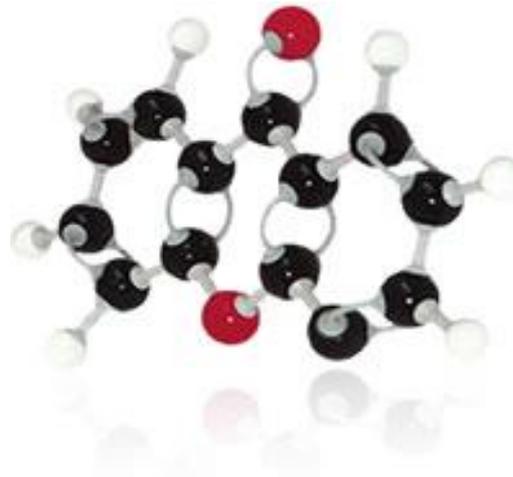

Mangosteen offers outstanding qualities when it comes to nutritional value and radical inhibition. It is even so that Mangostan-Gold has more scientifically proved powers through the antioxidants than the juices of **Noni** and **Aloe-Vera**, which both have been sold in multi-billion-dollar amounts.

The most examined components of Mangosteen are the xanthenes. This group of vegetal nutrients is strongly bioactive and outstanding because of its very potential antioxidativ qualities. Of all products known for its content of xanthone, the Mangosteen fruit contains the highest concentration. So far 43 different sorts of xanthone combination have been identified in the Mangosteen fruit. Actual scientific results show that the xanthenes in Mangosteen have extremely potential powers to support life in a holistic way...

It takes approximately ten years for a Mangosteen tree to carry ripe fruits and it is one of the few trees that does not need any pesticides and fungicides.

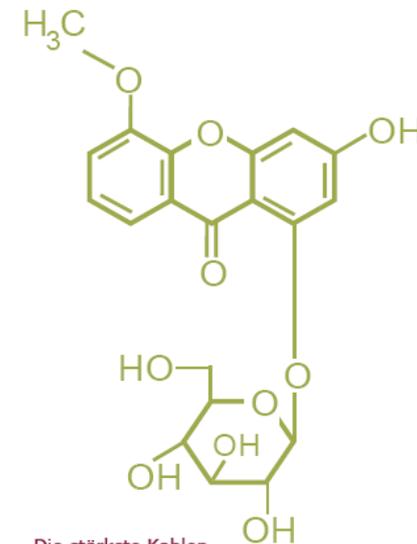

## The strongest, traditional natural powers of this world:

### Xanthones

#### Xanthones and their meaning

Mangosteen contains more than 40 xanthones and is thereby the richest source of natural xanthones. No other fruit reaches these levels. Clinical studies and laboratory tests have shown that the xanthones in Mangosteen are responsible for a great number of different medical uses.

Die stärkste Kohlenstoff-Verbindung

## The strongest, traditional natural powers of this world:

**Lycopene**

### Lycopene and its meaning

Lycopene is one of the strongest and most efficient antioxidants that we know of. In other words it is a radical inhibitor, which means it can capture certain aggressive molecules in the human body and put them out of action.

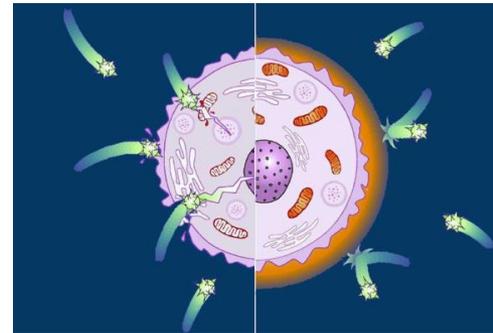

## The strongest, traditional natural powers of this world:

### Antioxidants and their meaning

### Antioxidants

Antioxidants (also known as antioxidants, antioxidants or free radical catcher) neutralize free radicals and are the classical radical inhibitors against oxidative stress.

Free radicals are highly reactive oxygen compounds (aggressive molecules).

*Active cell  
Protection!*

The increased formation of free radicals come from stress, ozone, smog, uv-light, malnutrition, consumption of alcohol and tabac.

Lycopene, xanthones, provitamin A, vitamin C and vitamin E, which all react with aggressive compounds and put them out of action, are all an effective protection against free radicals.

## The strongest, traditional natural powers of this world:

Opunzia

Opunzia (Prickly Pear) and its meaning.

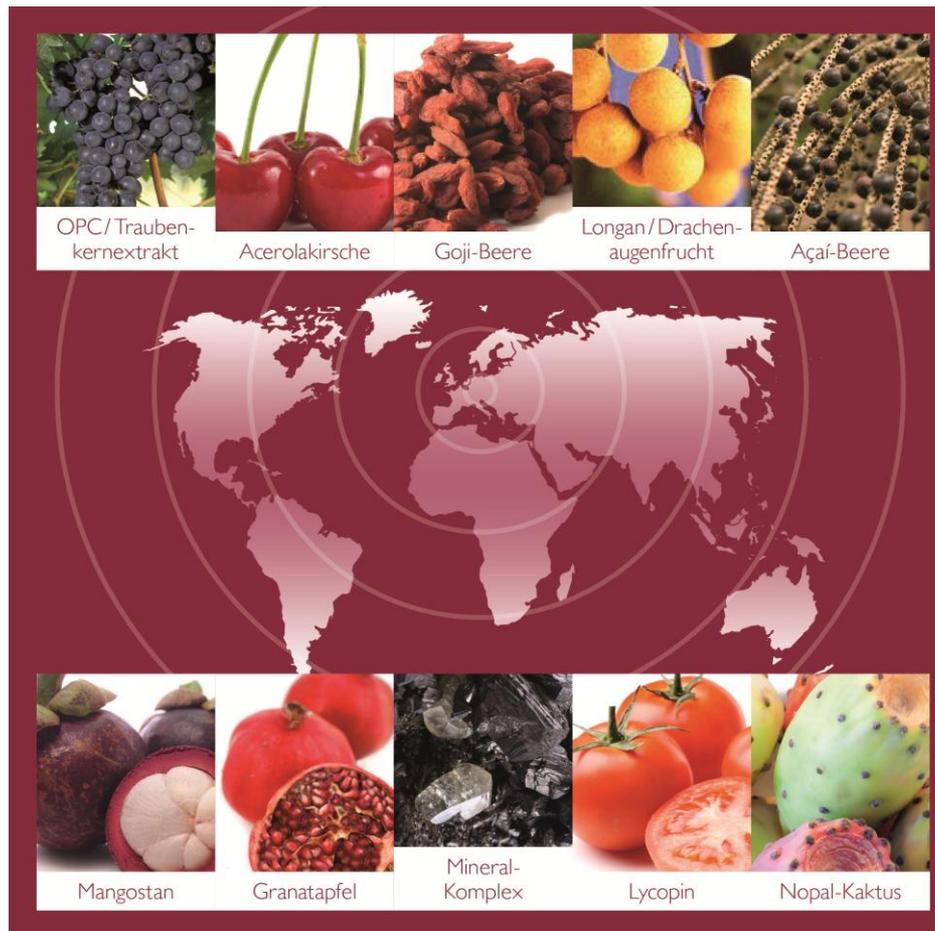

The prickly pear, (*Opuntia-ficus-indica*) also known as nopal, is a valuable supplier of vital substances. Opunzia contain very high concentrations of vitamin A, B1, B2 and C as well as the mineral substances and trace elements potassium, calcium, phosphor, sodium and iron. Above that nopal contains an extremely high amount of pectin.
